**Don:**

The TDSHS is out here at my request. I asked them to go around and talk to the residents to gather information about health concerns and talk with them a little about what we are doing as well as letting them know about the planned community meeting on December 11. I believe that you already know that the one previously scheduled for November 20 was cancelled because we could not find an acceptable location for the number of people expected.

As far as update:

We are trying to get all transferred vacuum boxes shipped off-site by Tuesday of next week. We are discharging contaminated stormwater into the sanitary sewer as authorized by the City of Houston. We are in the process of removing oil from the secondary containments and beginning the disposal of materials from the Aboveground Storage Tanks. We have disposed of materials out of Frac Tanks 1001, 1002. We have samples outstanding on the Dana Frac Tanks and are having our Houston Lab help us on some special analyses on FT 1004 and 506 to reduce our disposal costs on these 2 containers.

Hope this is helpful.

**Subject:** Update on CES waste removal?

Gary,

Could you give us an update on your progress and tentative schedule at CES? We have been getting inquiries and as you can see from the attached Flyer the Texas Department of State Health Services has recently become involved.

Thanks

Donald R. Richner, CIH
